

# Take Your EPMS Servers To The Cloud

## Reduce Costs And Simplify Administration

Enterprise Print Management Solutions (EPMS) has partnered with ENKI, a premiere provider of high performance managed cloud hosting services, to host your EPMS application in the cloud and provide you simplified administration and long term costs savings. ENKI offers a selection of EPMS-certified hosting packages for EPMS's Enterprise32 and Enterprise.net applications to replace onsite installations over a wide range of options.

## ENKI's EPMS Cloud Hosting Advantages

### Significant Cost Savings

We know comparing the costs between an onsite or cloud hosted solution can be difficult. Our goal is to save you money both on your hosting and internal staffing required to manage your EPMS servers. To start with, ENKI's EPMS cloud hosting is offered at highly competitive pricing. But your largest cost savings come from not having to spend money and time to purchase, install, maintain, and manage your own servers and the expensive supporting infrastructure they require.

### Simplified Administration

Stop worrying about hardware purchases, maintenance contracts, hardware failures, backups, correct server sizing, networking setup, network security, or Microsoft licensing to keep your EPMS installation running. And with our optional full-service administration plans, you can free your IT department from the 24x7 responsibility for managing your EPMS servers.

### Latest Technology

Our powerful multiprocessor, multi-core servers equipped with ample memory and 20Gbit networking can handle your peak computing loads, and our lightning-fast storage can handle anything EPMS can dish out. ENKI's outstanding bandwidth quality places your application in unequalled proximity to your customers, with world-class ping times.

### Pay Only For What You Need

ENKI's cloud hosting packages are sized based on EPMS' recommendations and our 8 years of cloud hosting experience to accommodate your user base for a single flat monthly fee that includes compute, storage, bandwidth, and backups. Should your needs grow, additional resources can easily be added in minutes with a phone call or email, all at affordable rates. No matter how much you grow, you will only be paying for the resources you need.

### Reliability and Security

Our data centers are top tier, SSAE-16 certified, offering redundant power, mechanical diversity, and physical security. Redundant servers, networking, and data storage with VMware's automated hot failover keep downtime to a minimum, giving you peace of mind. Included web application firewall and virtual security systems keep your customer data safe.

### Seamless Support

Should you have problems with your EPMS software or service, you simply contact EPMS, just as you would if you hosted the software yourself. If the cause is related to ENKI's cloud hosting, EPMS will contact ENKI to initiate resolution of the issue for you. You are always welcome to contact ENKI directly if you need changes made to your cloud infrastructure.

	SQL Server VM only	1	
	Veeam Backup Services	All Servers	
	Virtual Infrastructure Support	24x7 by phone or web	
	Infrastructure Uptime Guarantee	99.99% w/10x Refund	
<b>1-5 Users</b>	Compute Power Storage Bandwidth	10GB / 3.5 Cores 50 GB + 10GB Backup 50 GB/mo	<b>\$668 / mo</b>
<b>1-10 Users</b>	Compute Power Storage Bandwidth	14GB / 4.5 Cores 50 GB + 10GB Backup 100 GB/mo	<b>\$866 / mo</b>
<b>1-20+ Users w/ Ecommerce</b>	Compute Power Storage Bandwidth	18GB / 8 Cores 50 GB + 10GB Backup 150 GB/mo	<b>\$1384 / mo</b>
<b>Custom Package Upgrades &amp; Resource Overage Charges</b>	Compute (incl. Windows licensing)		\$0.054/GB-hr
	Internet Bandwidth		\$0.15/GB
	Standard Storage		\$0.14/GB-mo
	Backup Storage		\$0.05/GB-mo
	High Performance Storage Option		\$0.12/GB-mo + \$0.12/1M IOPS
	MS SQL Server Standard License		\$150/mo
	Extra MS Terminal Server Licenses		\$6/user-month
	Firewall & Anti-Virus License		Multiple options available
Full 24x7 Technical and Administration Support		Plans vary, please contact us for details	

## The Details

- ❖ While ENKI and EPMS have worked together to offer the best cloud hosting for your EPMS application, please order your cloud hosting directly from ENKI. ENKI will work seamlessly with EPMS to ensure your software is installed and configured correctly.
- ❖ Once in production, EPMS will be your first line of support with ENKI's expert team making sure that your hosting environment is operating flawlessly.
- ❖ Services are delivered from ENKI under a term contract including our Terms of Service.
- ❖ The virtual desktop services in these packages can be used to host other Windows applications including Microsoft Office. However, the resources supplied with our packages are only intended for hosting EPMS software. Additional resources may be required (at additional charge – see table above) to ensure adequate performance if non-EPMS software is installed.
- ❖ EPMS's Enterprise32 and Enterprise.net applications require the use of MS SQL Server Standard Edition and per-user terminal services. These licenses can either be provided by you or added to the bundle as a package upgrade listed in the table above.
- ❖ There may be a setup fee to move an EPMS installation from another location or for installations that do not follow EPMS's guidelines available at [http://entpms.com/basic\\_install.html](http://entpms.com/basic_install.html)
- ❖ We can also create a personalized hosting package for larger deployments. Use of computing resources (compute, storage, bandwidth) in excess of amounts included in the standard packages will incur our standard unit pricing as listed above.
- ❖ Neither ENKI nor EPMS are responsible for failures, security breaches, or poor performance due to installation of third-party software or as a result of downloading files or programs from the internet. ENKI recommends an enterprise firewall with unified threat management and an endpoint antivirus solution (available separately.)
- ❖ ENKI offers full systems administration plans that eliminate the need for you to have IT/server experts on staff to maintain your EPMS hosting environment. These plans do not include support for desktop environments hosted at ENKI, including third party software or your desktop computers. We also offer these services on a T&M basis. Please contact us for pricing.
